

Technical data	
Communication ports	- RJ45 LAN - RS232 - RS485 x2 - OneWire
Voltage output	12V (sygnalizator akustyczny)
Logging memory	16mln records
Power	230V AC
Approximate operating time on battery power	20 hours
Operating conditions	-10°C .. 60°C Humidity: 0..75%
Storage conditions	Temperature: -20°C..60°C Humidity: 0..75%
Electromagnetic compatibility (EMC)	Resistance as per standard PN-EN61000-6-2
Data communication	Operating frequency: 868.4 MHz for both radio channels.
GSM modem	For sending alarms in the form of SMS messages.
Installation data	
External dimensions	Housing: 239x289x107mm (W/HD) with antenna 239x413x107mm (W/H/D)
Weight	2.2kg
Fixing	4 handles included

Description:

The Logginet UNI/ZB recording centre enables the registration of data from the Logginet-WS, Logginet Standard and Logginet Clip system sensors. Additionally, it cooperates with the Loggicar-R vehicle recorders. The collected data are transmitted via LAN or RS485 connection to the Loggisoft programme.
