

Technical data	
Communication ports	- RJ45 LAN - RS232 - RS485 x2 - OneWire
Voltage output	12V (saunder)
Logging memory	16mln records
Power	230V AC
Operating conditions	-10°C .. 60°C Humidity : 0..75%
Storage conditions	Temperature: -20°C..60°C Humidity: 0..75%
Electromagnetic compatibility (EMC)	Resistance as per standard PN-EN61000-6-2
Data communication	Operating frequency: 868.4 MHz for both radio channels.
Installation data	
External dimensions	Housing: 240x191x107mm (W/H/D) with antenna 294x191x107mm (W/H/D)
Weight	1.0kg
Fixing	4 handles included
Degree of protection, enclosure	IP65, ABS

DESCRIPTION:

The Logginet UNI-R logging center registers data from the sensors of the Logginet-WS, Logginet Standard and Logginet Clip systems. The collected data are transferred via LAN or RS485 connection to the Loggisoft program.
